Find the MAC address for a device

A media access control (MAC) address is a unique code assigned to a device that is 12 characters long. Follow the instructions below for finding out the MAC address for your device.

Windows 10

1. Click on the Start menu. Type `cmd` and click `OK`.
2. When the black window appears, type in `ipconfig /all` (please note there is a space between ipconfig and `/`).
3. Under the title of `Wireless LAN adaptor`, there should be a line that says `Physical address`:
   The following code is your MAC address.

Mac OS X

1. Launch `Terminal` from the `Applications: Utilities` folder.
2. Type the following in to the terminal window: `ipconfig en1` and then press `Enter`.
3. Mac address is on the line beginning with `ether` or `lladdr`.

CISCO Phone

1. Please select the `Settings` button on the phone itself.
2. Navigate down the list to `Network Configuration` and press `Select`.
3. Navigate down the list to `MAC Address` tab.

PS4/Xbox One

**PS4**

1. Go to the `Home` menu of the PS4, then navigate to `Settings`.
2. Select `System` from the list.
3. Select `System Information`. You will see your MAC Address listed on this screen.

**Xbox One**

1. Navigate to `Settings`.
2. Select `Network`, then `Network Settings`.
3. Select `Advanced Settings`. You will see your MAC Address listed on this screen.
