Find the MAC address for a device

A media access control (MAC) address is a unique code assigned to a device that is 12 characters long. This is typically in the format of 6 two-character blocks (i.e. XX-XX-XX-XX-XX-XX), and will consist of the numbers 0–9 and the letters A–F.

Follow the instructions below for finding out the MAC address for your device.

Windows 10

1. Click on the Start menu. Type `cmd` and click OK.
2. When the black window appears, type in `ipconfig /all` (please note there is a space between `ipconfig` and `/`).
3. Under the title of Wireless LAN adaptor, there should be a line that says Physical address: The following code is your MAC address.

Mac OS X

1. Launch Terminal from the Applications: Utilities folder.
2. Type the following in to the terminal window: `ipconfig en1` and then press Enter.
3. Mac address is on the line beginning with ether or lladdr.

CISCO Phone

1. Please select the Settings button on the phone itself.
2. Navigate down the list to Network Configuration and press Select.
3. Navigate down the list to MAC Address tab.

PS4/Xbox One

PS4

1. Go to the Home menu of the PS4, then navigate to Settings.
2. Select System from the list.
3. Select System Information. You will see your MAC Address listed on this screen.

Xbox One

1. Navigate to Settings.
2. Select Network, then Network Settings.
3. Select Advanced Settings. You will see your MAC Address listed on this screen.
